

What is claimed is:

1. In combination in a computer aided design workstation configured with communication links to select database storage comprising:
 - (a) processor for implementing a stored program directed to presentation graphics; said processor further programmed to implement one or more software agents for enhancing and automating a presentation design sequence; said agent including programming for developing a common branding theme through multiple slides and seamlessly generating a common appearance through said multiple slides wherein said multiple slides collectively comprise a unified presentation; and
 - (b) database for storing a library of Model slides having specific attributes to corporate-based identifying and/or industry related themes
2. The system of claim 1 wherein said presentation software agents include programming for automatically creating Title, Table of Content, and Standard Content slides during an initial phase of said sequence.
3. The system of claim 2 wherein shapes can be added to Model slides having a common property set in compliance with a stored configuration file.
4. The system of claim 3 wherein said shapes are classified as either in compliance or non-compliant depending on whether a shape's associated property set matches a pre-set configuration file for that shape.
5. The system of claim 1 wherein presentation software agents include programming to automate slide creation process.
6. The system of claim 5 wherein the presentation software agents include programming to fix a linear toolbar horizontally across a display screen with plural slide management commands.
7. The system of claim 5 wherein said slide management commands comprise tabs and/or icons for triggering programs to implement help assistant; insert selected shapes, and toggle between print and projection formats.
8. The system of claim 1 wherein said database further comprises plural logo files.

9. The system of claim 1 wherein said database includes slide templates associated with team pages, tombstones, qualifications, copying pages and organizational charts.

10. The system of claim 5 wherein said software agent programming includes commands for automatic positioning of shapes on a slide.
